Weston Richardson

weston-richardson@charter.net - (864) 444-0898

www.weston-richardson.info

I am looking for full-time employment with a stable organization that extends my professional experience within the Information Technology field.

IT Related Experience

Part-Time Developer   2019

- Assisting consultant with AWS cloud applications development.
  - Developing an EC2 hosted HTML front-end and PHP API backend to utilize an RDS database for tracking associate badge information during company giveaways.
  - Developing AWS API Gateway and Lambda micro-services to perform CRUD processes on the badge database. The html is hosted in a BeanStalk environment and one of the endpoints will be connected to an SQS queue to add badge info to the database. Other AWS cloud services such as S3, SNS, SES, and Cognito are being used as well.

IT Technician @ eXcell Staffing Div. CompuCom   2018

- Project assignment primarily focused on a large-scale laptop/desktop refresh rollout for Fluor Corporation in Greenville SC, but also assisted in daily break/fix support in certain situations.
  - Hired as the initial technician and trained 2 others on defined rollout process
  - Inventoried and imaged hundreds of computers
  - Did testing and remediation of hardware/software issues during rollout
  - Interacted with end users to coordinate satisfactory equipment replacement
  - Performed remote IT support for equipment swap-out for distant personnel

IT Support Resource @ CGF LLC   2017

- Project assignment primarily focused on a large-scale MFD (multi-function printing devices) rollout at BMW Manufacturing in Greenville SC, but also assisted in daily tech support issues in certain situations.
  - Supported asset management and deployment planning for the MFD project
  - Imaged laptops and performed equipment swap-out with users
  - Performed other tech support tasks (maintained Active Directory information, updated Remedy ticketing information, master data management clean-up, etc.)

Applications Development Intern   2015-2016

- Worked with a family member who does IT consulting on various engagements.
  - Contributed to development/customization of internet websites for small/medium sized businesses
  - Developed a front-end application that interfaced to a cloud-based Infusionsoft CRM application using a RESTful web service API
  - Used content editor web-parts to customize SharePoint intranet pages using standard web tools and specialized JavaScript libraries
  - Assisted with development of supporting documentation for delivered services

Part-Time Programmer   2013-2014

- Provided programming services to a small leasing/finance business while in college.
  - Website content management using WordPress, Flash, Photoshop, etc.
  - Customer database maintenance and reporting using MS Access
  - Marketing emails and other business special project support
